RE: The Fight Against GMOs

Dear Dr. Henney:

Hello, my name is Beth Montgomery, and I was taken back a bit by the July/August 1999 article in "Healthy Living," regarding the above captioned topic. My questions is, "When are companies like Monsanto and Proctor & Gamble going to stop creating such compounds and changing our land, our environment, and our food? All of this sadly enough to say, for their own gain. The very thought of their actions sickens me to think that we and our children and their children, etc. are going to suffer from the mistakes being made by such companies. Needless to say, I am violently opposed to these processes, and I am voicing my opinion in hopes that you can aide in doing something to: a. stop it altogether, or b. let ALL such foods be labeled so that we, the public, at least have a choice about what we put into our mouths and our families mouths.

Thank you for your help, and I look forward to seeing results concerning these matters. I send

Best Regards,

*Beth Montgomery*
